## PROJECTS

### **Retail Sales Performance Dashboard – Excel BI Project**

*GitHub Repository: <https://github.com/SHAII001/retail-sales-dashboard>*

- Built an interactive Excel-based dashboard analyzing sales, profit, and regional performance using PivotTables, slicers, and visualizations.
- Developed KPI metrics (Total Sales, Total Profit, Profit Margin) and dynamic charts for Region, Category, and Monthly Trends.
- Cleaned and transformed raw sales data; engineered Month/Year fields; applied structured pivot logic to generate actionable business insights.
- Designed a professional BI-style layout with consistent formatting, slicer-driven filtering, and user-friendly reporting features.
