PROFESSIONAL SUMMARY

Entry level Data Analyst with strong SQL and Excel skills focused on extracting, cleaning, and analyzing data to support business decision making. Experienced working with structured datasets and writing SQL queries using joins, aggregations, filtering, and window functions to answer business questions. Skilled in identifying trends, validating data accuracy, and creating clear reports for stakeholders. Currently completing an Advanced Data Analytics certification to further strengthen SQL, analytics, and business intelligence capabilities.

SKILLS

SQL

Query writing, joins, aggregations, filtering, GROUP BY, window functions

Data Analysis

Data extraction, data cleaning, validation, trend analysis

Excel

Pivot tables, dashboards, reporting

Tools

PostgreSQL, GitHub, PowerPoint, Word

PROJECTS

Customer Loan Performance Analysis | SQL Data Analysis

- Wrote SQL queries to analyze loan application datasets and identify approval and default trends
- Used joins, filtering, grouping, and aggregations to answer business questions
- Calculated performance metrics including approval rates and default trends
- Identified patterns in incomplete income documentation linked to higher default risk
- Documented queries and analysis in GitHub project repository

Excel Dashboard and Reporting Project

- Cleaned and structured raw datasets for analysis
- Built KPI dashboards using pivot tables and calculated metrics
- Analyzed trends in operational data and summarized insights into reports
- Created visual summaries to support business decision making

Superstore Sales Analysis | SQL & PostgreSQL

- Analyzed 9,994 retail transactions using SQL in PostgreSQL to evaluate sales, profit, discount behavior, and regional performance
- Used joins, aggregations, and window functions to answer business questions and identify profitability trends
- Identified high discount levels as a key driver of lower profit margins
- Evaluated regional sales performance and identified Technology as the highest profit generating category

PROFESSIONAL EXPERIENCE

Loan Specialist | Data Analysis & Reporting

Turn2Partners | Remote

May 2022 to Nov 2025

- Analyzed loan application datasets using Excel to identify missing information, inconsistencies, and processing gaps
- Performed data validation and quality checks across structured records to improve data accuracy
- Investigated operational trends and summarized findings to support decision making
- Maintained organized datasets used for internal reporting and analysis
- Collaborated with cross functional teams to resolve data discrepancies and improve reporting workflows
- Documented data handling processes to improve reporting consistency

Customer Service Representative

HKT Teleservices | Remote

Dec 2017 to Nov 2019

- Analyzed customer interaction data to identify recurring service issues and operational trends

- Generated Excel based reports to summarize performance metrics and support leadership decisions
- Documented workflows and resolution outcomes to improve internal reporting accuracy
- Maintained data integrity across high volume customer records

Customer Service Representative

Teleperformance USA

Jun 2016 to Dec 2017

- Captured and maintained structured customer data to support internal reporting processes
- Ensured data accuracy and completeness in high volume environments
- Supported performance tracking and documentation initiatives
